

Colin Simpson RPT -As you like it - October 19th 2005

Reviewed by Alan Elkins

Stephen Cooper was unable to attend due to illness and members expressed their hope for his early recovery. Club member Colin Simpson stepped into the breach.

He offered us a choice: "Something Square" was the cry.

Make sure the stock is square and find the centre - doing it well. Mount it on a screw chuck and watch your fingers on the corners! Turn fast, approach slowly. Caress the wood using a bowl gouge with a fingernail profile. Flatten the face, cut a spigot and profile the outside. Reverse, mount it in the chuck and turn the inside making the inside and outside parallel, at least until you get into solid stock - then the edge will be nicely parallel.
